## 2 Mechanics

### 2.1 General

|                                                       |                                                                         |  |
|-------------------------------------------------------|-------------------------------------------------------------------------|--|
| Width                                                 | 119,0 mm                                                                |  |
| Height                                                | 119,0 mm                                                                |  |
| Depth                                                 | 38,0 mm                                                                 |  |
| Mass                                                  | 0,390 kg                                                                |  |
| Housing material                                      | Metal                                                                   |  |
| Impeller material                                     | Plastic                                                                 |  |
| Max. torque when mounted across both mounting flanges | Wire outlet corner: 420 Ncm<br>Remaining corners: 560 Ncm               |  |
| Screw size                                            | ISO 4762 - M4 degreased, without an additional brace and without washer |  |

### 2.2 Connections

|                       |             |  |
|-----------------------|-------------|--|
| Electrical connection | Wires       |  |
| Lead wire length      | L = 310 mm  |  |
| Tolerance             | +/- 10,0 mm |  |

| Wire | Color | Operation | Wire size | Insulation diameter |
|------|-------|-----------|-----------|---------------------|
| 1    | red   | + UB      | AWG 22    | 1,7 mm              |
| 2    | blue  | - GND     | AWG 22    | 1,7 mm              |
| 3    | white | Tacho     | AWG 22    | 1,7 mm              |

The auxiliaries shown on the schematic diagram (which are required for the intended use) are not part of our delivery.

### 3 Operating Data

#### 3.1 Electrical Operating Data

Measurement conditions: Normal air density = 1,2 kg/m<sup>3</sup>; Temperature 23°C +/- 3°C; Motor axis horizontal; warm-up time before measuring 5 minutes (unless otherwise specified). In the intake and outlet area should not be any solid obstruction within 0,5 m.

$\Delta p = 0$ : corresp. to free air flow (see chapter aerodynamics)  
I: corresp. to arithm. mean current value

| Features                     | Condition      | Symbol | Values      |             |             |
|------------------------------|----------------|--------|-------------|-------------|-------------|
| Voltage range                |                | U      | 12 V        |             | 30 V        |
| Nominal voltage              |                | $U_N$  |             | 24 V        |             |
| Power consumption            | $\Delta p = 0$ | P      | 2,7 W       | 12,5 W      | 12,6 W      |
| Tolerance                    | 0010           |        | +/- 17,5 %  | +/- 17,5 %  | +/- 17,5 %  |

| Tacho signal High         | $U_{S \text{ high}}$                                                                   | $I_{\text{source}}: 0 \text{ mA}$<br>60 V               |
| Maximum sink current      | $I_{\text{sink}}$                                                                      | $\leq 10 \text{ mA}$                                    |
| External resistor         | External resistor $R_a$ from $U_{BS}$ to $U_s$ required. All voltages measured to GND. |                                                         |
| Tacho frequency           | $(2 \times n) / 60$                                                                    | 166 Hz                                                  |
| Tacho isolated from motor | No                                                                                     |                                                         |
| Slew rate                 |                                                                                        | $\geq 0,5 \text{ V/us}$                                 |

$n$  = revolutions per minute (1/min)

### 3.3 Electrical Features

|                                |                                     |  |
|--------------------------------|-------------------------------------|--|
| Electronic function            | Speed-Controlled                    |  |
| Reversed polarity protection   | Rectifying diode                    |  |
| Max. residual current at $U_N$ | $I_F \leq 10 \text{ mA}$            |  |
| Locked rotor protection        | Auto restart                        |  |
| Locked rotor current at $U_N$  | $I_{\text{block}}$ approx. 3.300 mA |  |
| Clock signal at locked rotor   | $t_3 / t_4$ typical: 1,2 s / 5,0 s  |  |

### 3.4 Aerodynamics

Measurement conditions:

Measured with a double chamber intake rig acc. to DIN EN ISO 5801.

Normal air density = 1,2 kg/m<sup>3</sup>; Temperature 23°C +/- 3°C;

In the intake and outlet area should not be any solid obstruction within 0,5 m. Motor shaft horizontal.

The information is only valid under the specified test conditions and may be changed by the installation conditions. If there are deviations from the standard test conditions, the characteristic values must be checked under the installed conditions.

a.) Operation condition:

5.000 1/min at free air flow

|                                                             |                         |  |
|-------------------------------------------------------------|-------------------------|--|
| Max. free-air flow ( $\Delta p = 0$ / $\dot{V} = \max.$ )   | 260,0 m <sup>3</sup> /h |  |
| Max. static pressure ( $\Delta p = \max.$ / $\dot{V} = 0$ ) | 250 Pa                  |  |

### 3.5 Sound Data

Measurement conditions: Sound pressure level: 1 meter distance between microphone and the air intake.  
 Sound power level: Acc. to DIN 45635 part 38 (ISO 10302)  
 Measured in a semianchoic chamber with a background noise level of  $L_p(A) < 5 \text{ dB(A)}$   
 For further measurement conditions see chapter aerodynamics.

a.) Operation condition:

|                                                                 |                                  |  |
|-----------------------------------------------------------------|----------------------------------|--|
| 5.000 1/min at free air flow                                    |                                  |  |
| Optimal operating point                                         | 160,0 m <sup>3</sup> /h @ 100 Pa |  |
| Sound power level at the optimal operating point                | 6,7 bel(A)                       |  |
| Sound pressure level at free air flow, measured in rubber bands | 60,0 dB(A)                       |  |

## 4 Environment

### 4.1 General

|                                            |        |  |
|--------------------------------------------|--------|--|
| Min. permitted ambient temperature TU min. | -20 °C |  |
| Max. permitted ambient temperature TU max. | 65 °C  |  |
| Min. permitted storage temperature TL min. | -40 °C |  |
| Max. permitted storage temperature TL max. | 80 °C  |  |

### 4.2 Climatic Requirements

|                       |                                                               |  |
|-----------------------|---------------------------------------------------------------|--|
| Humidity requirements | humid heat, constant; according to DIN EN 60068-2-78, 14 days |  |
| Water exposure        | None                                                          |  |
| Dust requirements     | None                                                          |  |
| Salt fog requirements | None                                                          |  |

Permitted application area:

The product is intended for use in sheltered rooms with controlled temperature and controlled humidity. Directly exposure to water must be avoided.

Pollution degree 1 (according DIN EN 60664-1)

There is either no pollution or it occurs only dry, non-conductive pollution. The pollution has no negative impact.

Please require severity levels and specification parameters from the responsible development departments.

## 5 Safety

### 5.1 Electrical Safety

|                                                                                                                                                                                                                                                                                                                                                                                           |                                          |  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|--|

Schutzmerk nach DIN ISO 16916 beachten/  
Refer to protection notice DIN ISO 16916

-1)= Maße für Montagewand

- Axialspiel bei Kugellagerung (K) : 0 (durch Federausgleich)
- Axialspiel bei Gleitlagerung (G) : 0,1 bis 0,6
- 2)= Mit Handhabungswerkzeug montiert.

Kopf darf nach Montage nicht über Außenkontur des Lüftergehäuses stehen

-1)= Measures for prefab wall

- Axial play with ball bearing (K): 0 (by spring compensation)
- Axial play with sleeve bearing (G): 0,1 to 0,6
- 2)= With handling tool installed.

Head may not stand over outer contour of the fan housing after assembly

Leitungslänge siehe Produktspezifikation  
For conduit length see product specification
