Motor protection	Electronic motor protection
With cable	Lateral
Protection class assignment	<p>I; If a protective earth is connected by the customer</p> <p>This component for installation may have several local protection classes. This information relates to this component's basic design.</p> <p>The final protection class is based on the component's intended installation and connection.</p>
Conformity with standards	EN 45545-2, HL3; EN 50155; EN 61373, Cat. 1B
Approval	EAC
Comment	<p>A prerequisite for operation is a Class 1 vehicle electrical system architecture according to EN 50533; if supply potential (e.g. 230 VAC) is passed through the alarm relay, the SELV signal wires lose their property of reinforced insulation and they then have only basic insulation</p> <p>The SELV property (reinforced insulation) is not lost when voltages of up to 110 VDC are passed through the alarm relay.</p>

Curves: Air performance

$\rho = 1.15 \text{ kg/m}^3 \pm 2 \%$

Measurement: LU-194611-1
Measurement: LU-194668-1

Air performance measured according to ISO 5801 installation category A. For detailed information on the measurement setup, contact ebmpapst. Intake sound level: Sound power level according to ISO 13347 / sound pressure level measured at 1 m distance from fan axis. The values given are valid under the specified measuring conditions and may vary due to conditions of installation. For deviations from the standard configuration, the parameters have to be checked on the installed unit.
