| 03 Efficiency category            |   | Static |           | 09 Pressure increase $p_{fs}$ | Pa                | 336   |
| 04 Efficiency grade N             |   | 43     | 40        | 10 Speed (rpm) n              | min <sup>-1</sup> | 1365  |
| 05 Variable speed drive           |   | Yes    |           | 11 Specific ratio*            |                   | 1.00  |

Data obtained at optimum efficiency level.

\* Specific ratio =  $1 + p_s / 100\,000\text{ Pa}$

LU-202156

The efficiency values displayed for achieving conformity with the Ecodesign Regulation EU 327/2011 has been reached with defined air duct components (e.g. inlet rings).  
The dimensions must be requested from ebm-papst. If other air conduction geometries are used on the installation side, the ebm-papst evaluation loses its validity/the conformity must be confirmed again.  
The product does not fall within the scope of Regulation (EU) 2019/1781 due to the exception specified in Article 2 (2a) (motors completely integrated into a product).

# EC axial fan - HyBlade

sickle-shaped blades (S series)

Duct fan

## Technical description

|                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

# EC axial fan - HyBlade

sickle-shaped blades (S series)

Duct fan

## Curves: Air performance 50 Hz

$$\rho = 1.15 \text{ kg/m}^3 \pm 2 \%$$

Measurement: LU-202156-1

Air performance measured according to ISO 5801 installation category A. For detailed information on the measurement setup, contact ebm-papst. Intake sound level: Sound power level according to ISO 13347 / sound pressure level measured at 1 m distance from fan axis. The values given are valid under the specified measuring conditions and may vary due to conditions of installation. For deviations from the standard configuration, the parameters have to be checked on the installed unit.
