Product Description

The 4312/12M is an ebm-papst 12V DC axial compact fan, measuring 119x119x32mm. It delivers 2300 RPM and an airflow of 140 m³/h (82 CFM) with just 3.1W of power consumption, maintaining a low noise level of 39 dB(A). Featuring ball bearings and protected against reverse polarity, locked rotor, and overload, this fan is ideal for electronics, cabinets, and various compact DC applications requiring efficient and quiet cooling.

Technical Specifications

Attribute	Value
Model	4312/12M
Manufacturer	ebm-papst
Dimensions	119.3x119xx32 mm
Voltage Rating	12 VDC
Current Rating	3.1 A
Subcategory	DC axial compact fan
Bearing Type	Ball Bearing
Fan Type	DC
